SANTI GARCÍA

Front-End Web Developer

santigarcia.dev | ✉ | in | ○

💻 TECH SKILLS

Javascript | React

Confident in building interactive, modular systems and products, including single-page applications. Experience with Hooks, Context, State management, routing, TDD.

HTML | CSS | UI

Confident in creating performant and responsive web content according to given UI guidelines. Also confident in creating designs and solutions from scratch, according to given requirements. Dexterous use of CSS Grid, Flexbox, simple animations, semantic HTML.

Node.js | Express | Socket.io

Confident in building reliable, basic backend systems, creating and interacting with REST API's, databases, session and authentication systems, basic deployment flows, real-time communication systems.

Some other tools I use regularly: **Git/Github, MongoDB, Figma, Photoshop, Spreadsheets.**

✏️ LATEST PROJECTS

'Port': A chat system with live typing [Link]

- I designed and coded an intuitive and responsive UI with a unique, (very) dark-mode look and custom-built CSS animations.
- I architected and coded the backend to allow for private chats, temporary rooms and users, on/offline/live user states, multi-device live-synching, a sign-up/log-in system and more. I published a minimum viable product after about three weeks of work.

Tana's art gallery [Link]

- I worked with the artist to design a fully-featured modern website that would, however, let the artworks be front and center. I completed the assignement in two weeks.

🎓 EDUCATION

2020 **Full-stack Web Development** | August 2020 – Present
Full-time curriculum under direction and tutelage from my mentors. [Reference]

2020 **Web Development & Online Marketing** | November 2019 – January 2020
Digital Career Institute, Leipzig. [Certificate]

2013 **Bachelor's degree in Graphic Design** | September 2009 – January 2013
EASD Valencia (Official Design College of Valencia, Spain).

💼 WORK

Graphic Designer | Freelancer | February 2013 – March 2020 | [Sample works]

- I consistently delivered concepts, designs and strategies to satisfied clients. My work included creating visual identities, posters, logos, infographics, promotional materials and illustrations.
